Easy Case

Silicone case for in-ear headphones, 4.5 cm diameter

The 3-star Easy Case is the ideal storage solution for cables or in-ear headphones - both at home and on the road. The hinged, spherical shaped case is extremely lightweight and very compact, yet it offers ample space for in-ear headphones and their cables. The silicone case can naturally also be used for storing other headphones cables - with everything neatly wound inside. The high degree of rigidity of the silicone material provides the headphones with an impact-resistant barrier, meaning they are perfectly protected in your rucksack or bag. Your in-ear headphones can be removed quickly and easily from the case and used straight away.
